

New Clubhouse

The Forest

A beautiful new porte cochere and paved driveway will leave a lasting first impression as you approach the front of the Clubhouse.

Upon entering this open room, one will immediately notice the new cupola style roof and grand views of the golf course. The room will seat 208 for dinner with a 32-seat rectangular bar. All daily lunch and dinner service as well as large Club events will be held in this room, with the adjacent Member Lounge being used as the dance floor for large parties and weddings. The open feel and flexibility of our spaces will be greatly increased by replacing the walls between the Gumbo Limbo Bar and Grille, Banyan Room and Member Lounge with columns and Nano doors. Rooms can be separated during smaller events or the Nano doors can open during large events to make the entire space available for the event.

Our new open concept will allow conversation and company to flow freely from between the dining room and the member's lounge, located just past the lobby.

Members and guests will be able to dine and socialize on resort style seating on both brand new covered and sun terraces. Fire pits will add ambiance and a bit of warmth as you take in the beautiful Southwest Florida sunsets. Nano doors will be available to enclose the covered terrace if needed.

As you play down the 18th fairway of The Bear Course, you will now have sweeping views of our new Cupola roof over the Gumbo Limbo Bar & Grille as well as our new covered and sun terraces.
